Product Description

Product Description:

Tesla Style Navigation Android 8G 128G for Volkswagen Tiguan 2010-2016 Multimedia Player

The Volkswagen Excelle is a customized molded product for the original car. Compared with the traditional 9.7-inch screen, its screen size is larger, 13.6 inches, which can perfectly fit into the original car size without any deviation. The enlarged display screen provides car owners with better visual effects, even sitting in the back seat, making it easy to see video information

The old Envision smart host adopts QLED screen display, with clear images and almost one-to-one color reproduction. Even in strong light, there is no reflection or glare, which can maintain a good field of view

Dingwei's eight core central processing unit ensures that multiple software functions will not experience lag during operation, allowing for quick access to software pages and a more comfortable use
